Letter of Introduction for Wood Importers in South Africa

This letter is intended for Wood Importers in South Africa. We found your contacts through Google Map and believe that you import wood from other countries; therefore, I would like to introduce what we can offer with regards to this aspect.

We explore wood in the country of Angola in the provinces of Uíge, Bengo and Cabinda. We have also secured several partnerships with other smaller scale wood explorers who have only been distributing to the local market and are anxious to work with us due to our facilitation in exporting the wood.

At the moment we are able to accommodate up to five 40" feet containers per month, and we are now focusing on the South African market.

We're enclosing a few pictures of our operations for your viewing and in case you ever want to come to Angola for a visit.

We can prepare and package the wood in cubes, beams, planks, boards or laths at the height, thickness, length and width based on client's needs. A 20" feet container filled with wood weighs approximately 27 tons with 35 cubic meter (M3) of wood while a 40" feet is obviously double that quantity.

Currently one cubic meter of wood will cost in the range of USD 600 to USD 720 depending on the wood preparation requirements specified by the client excluding shipping costs.

We'll be more than happy to submit a detailed quotation when you're ready to import our wood.

It is our desire to do business with you and eagerly look forward to your early response, which will receive our prompt attention.

Thank-you.

Yours faithfully,

Agostinho Neto Joaquim Domingos
Founder, CEO, Director

Company Introduction

Ladilsa – Comércio Geral, Lda, Identification Fiscal Number 5484046890, is situated in Engenheiro Frederico Henriques dos Santos Street nº 4, Prenda, Luanda in the country of Angola, and it is led by **Agostinho Neto Joaquim Domingos**.

Company History

Agostinho Neto Joaquim Domingos was born in the province of Cabinda in Angola. Agostinho earned a full-ride scholarship from the renowned oil company called ExxonMobil to go study in the University of St. John's in New York City where he obtained a Bachelor's Degree of Science in Computer Science with a Business Minor.

Agostinho went on to work for ExxonMobil in Angola for 10 years where various key positions were held including Controls Advisor, Access, Controls & Applications Supervisor, and Telecommunications Supervisor.

Due to Agostinho's father passing in April of 2011, the family requested Agostinho to take over and run his father's company called Cabinter, Lda. This company was composed with over 100 national and expatriate employees. We were involved in various activities including:

- ✓ Civil and Public Construction all over Angola building several roads, social housing, residences, buildings, and general infrastructures, and water collection and distribution systems.
- ✓ General vehicle services such as maintenance, alignment, bodywork, painting, retreading and service station activities.
- ✓ Factory of Aluminum and PVC materials building doors, windows, false ceiling, and PVC pipes.

Due to the extreme economic breakdown in Angola in the year of 2017 which dragged all the way until COVID-19 also hit the world, we were forced to cease activities but managed to sell the properties of Cabinter, Lda and share the profits among family members.

Agostinho's father, who started Cabinter, Lda, held various high positions in the Government of Angola for which a couple of them included being the Governor of the Province of Cabinda and Minister of Agriculture.

Agostinho has since started Ladilsa – Comércio Geral, Lda and currently focusing on exporting wood from Angola.

Company Overview

Ladilsa – Comércio Geral, Lda initiated business in December of 2016 in the general retail trade selling food products, beverages, and tobacco. By the year of 2019 we had 15 small stores spread across the city of Luanda, namely in Prenda, Zamba 2, Cassenda and Luanda Sul.

Strategically, we transferred ownership of the 15 small stores to other newcomers in this type of business and moved on to wood exploration and distribution in the province of Cabinda, which was then followed in the provinces of Uíge and Bengo as well.

Due to our background recognition with the Ministry of Agriculture, we are now on a verge to export wood from Angola and aiming first at wood importers in South Africa.

Thank-you.

Yours faithfully,
